

BANDO N. 3/2023/TI/FUNZIONARIO DI AMMINISTRAZIONE - Concorso pubblico, per titoli ed esami, per l'assunzione con contratto di lavoro a tempo indeterminato di n. 1 unità di personale di V livello professionale, profilo professionale Funzionario di amministrazione.

TRACCIA 1

INRiM provides the national system metrological services, including calibrations, measurements, testing and proficiency testing (ILC). The Institute ensures traceability to the SI (International System of Units) according to the ILAC-P10 criteria "*ILAC Policy on the Traceability of Measurement Results*".

It offers over 400 Calibration and Measurement Capabilities (CMC) types in the fields of: mechanics, thermodynamics, time and frequency, electricity, photometry, acoustics and chemistry.

INRiM carries out various training activities collaborating with other bodies and institutions. It offers post-graduate training courses, such as a PhD in Metrology, thesis, internships, internships, courses aimed at the industry world, and school initiatives.

The Institute has a specialised scientific library with digital and paper collections access. The library offers bibliographic services available to internal and external users.

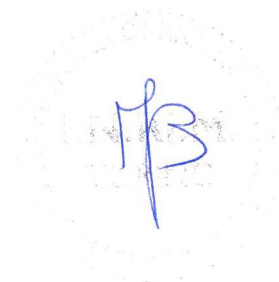

BANDO N. 3/2023/TI/FUNZIONARIO DI AMMINISTRAZIONE - Concorso pubblico, per titoli ed esami, per l'assunzione con contratto di lavoro a tempo indeterminato di n. 1 unità di personale di V livello professionale, profilo professionale Funzionario di amministrazione.

TRACCIA 2

INRiM is able to provide technical-scientific advice to public and specific metrological needs of the industry, to real short or long-term research contracts to address problems applications of interest to the client. Our expertise in measurement capabilities, knowledge of material properties and nano-fabrication of devices can help many industries improve their measurement systems or make a difference in the choice of components and materials for a production process.

The INRiM laboratories offer the following technological services:

- tests on equipment, components and materials,
- analysis of materials and measurement of their chemical-physical properties,
- design and construction of nanostructures and solid-state devices using lithography and nanofabrication techniques

BANDO N. 3/2023/TI/FUNZIONARIO DI AMMINISTRAZIONE - Concorso pubblico, per titoli ed esami, per l'assunzione con contratto di lavoro a tempo indeterminato di n. 1 unità di personale di V livello professionale, profilo professionale Funzionario di amministrazione.

TRACCIA 3

■ NextGenerationEU, the recovery plan of the European Union, with an investment of around 880 billion euros, an economic recovery project dedicated to member states..

The plan aims to promote an important European economic recovery under the banner of ecological transition, digitalisation, competitiveness, formation and social, territorial and gender inclusion.

Italy benefits from these funds for a total amount of about 190 billion euros, also enriched with complementary investments - and implements the plan through the - National Recovery and Resilience Plan (PNRR).

The Plan is divided into sixteen Components, grouped into six Missions.

INRiM seizes the opportunities offered by the PNRR and, also in synergy with Universities and other Research Centres, public or private entities, offers its contribution to the national recovery, strengthening the research and promoting the dissemination of innovative models for fundamental and applied scientific research.
